### 1 Цель работы

Получение практических навыков работы в консоли с атрибутами файлов для групп пользователей1.

### 2 Задачи

Научиться работать с консолью Rocky Linux.

### 3 Выполнение лабораторной работы

В установленной при выполнении предыдущей лабораторной работы операционной системе создам учётную запись пользователя guest (использую учётную запись администратора):

```
useradd guest2
```

Задам пароль для пользователя guest (использую учётную запись администратора):(рис. 1)(рис. 2)

```
passwd guest2
```

```
[erlisenkov@erlisenkov ~]$ sudo -i
[sudo] password for erlisenkov:
[root@erlisenkov ~]# useradd guest2
[root@erlisenkov ~]# passwd guest2
Changing password for user guest2.
New password:
Retype new password:
passwd: all authentication tokens updated successfully.
[root@erlisenkov ~]# gpasswd -a guest2 guest
Adding user guest2 to group guest
[root@erlisenkov ~]#
```

```
erlisenkov@erlisenkov ~]$ sudo -i
[sudo] password for erlisenkov:
[root@erlisenkov ~]# useradd guest2
[root@erlisenkov ~]# passwd guest2
Changing password for user guest2.
New password:
Retype new password:
passwd: all authentication tokens updated successfully.
[root@erlisenkov ~]# gpasswd -a guest2 guest
Adding user guest2 to group guest
[root@erlisenkov ~]# sudo -i
[root@erlisenkov ~]# passwd username
passwd: Unknown user name 'username'.
[root@erlisenkov ~]# passwd guest
Changing password for user guest.
New password:
Retype new password:
passwd: all authentication tokens updated successfully.
```

```
erlisenkov@erlisenkov ~]$ su guest2
Password:
[guest2@erlisenkov erlisenkov]$
```

Определию директорию, в которой вы находитесь, командой `pwd`. Сравню её с приглашением командной строки. (рис. 3) Уточню имя пользователя командой `whoami`. Уточню имя пользователя, его группу, а также группы, куда входит пользователь, командой `id`. Выведенные значения `uid`, `gid` и др. Сравню вывод `id` с выводом команды `groups`. (рис. 3)(рис. 4)

```
